

BRUCE BLUMBERG, PHD, has been conducting pioneering research in endocrinology and developmental biology for more than thirty years. He is professor in the Departments of Developmental and Cell Biology, Pharmaceutical Sciences, and Biomedical Engineering at the University of California, Irvine (UCI). At UCI, his laboratory studies the biology of nuclear hormone receptors in development, physiology, and disease with a particular emphasis on how these are affected by hormonally active compounds in the diet and environment. In 2012, he was elected as a fellow of the prestigious American Association for the Advancement of Science.
